PROFESSIONAL SUMMARY

Senior backend engineer with 15+ years designing, building, and operating production systems in **PHP and Laravel**, with supporting work in Node.js, GraphQL, and AI/LLM integration. Proven at scale: high-traffic ticketing platform processing **28,000+ bookings at 99.9% uptime**, a **multi-tenant SaaS** booking engine, and an enterprise internal-audit platform architected solo end-to-end for a national energy company. Combines backend engineering depth with audit-grade rigor (RBAC, data integrity, audit trails), and a current focus on governed, agent-based AI development workflows.

TECHNICAL SKILLS

Backend & APIs PHP 8.x, Laravel (v10–13), Filament, Livewire, Blade, Node.js, REST APIs, GraphQL, microservices, real-time systems

Data & Performance MySQL, PostgreSQL, Redis, schema design & normalization, query tuning, data integrity

Architecture Multi-tenant SaaS, RBAC, SOLID, MVC, design patterns, queue workers & scheduled jobs, payment gateway integration, audit-ready design

Frontend (supporting) Tailwind CSS, Alpine.js, JavaScript, RTL/LTR interfaces

Infra & Practices Docker, GitHub Actions CI/CD, Linux servers (Nginx/Apache), OWASP, testability-first code, technical documentation

AI AI/LLM integration, agent-orchestrated development workflows, LLM governance & versioning

PROFESSIONAL EXPERIENCE

Internal Audit Department Manager — Petroleum Pipelines Company (PPC), Cairo — 2016 – Present

Laravel, Filament, MySQL, RBAC — internal audit & compliance platform

- Solo-architected **InternalAudtingSys**, digitizing manual compliance workflows across departments — sustaining **100% data consistency** across audit cycles and multi-tier management approvals.
- Designed a granular **RBAC framework** separating auditor and management privileges, enforcing access control and complete audit-trail integrity.
- Built an automated reporting engine generating quarterly audit and compliance reports, eliminating manual assembly and accelerating executive decisions.
- Own the full lifecycle: requirements, architecture, implementation, deployment, security hardening, and ongoing operation.

Backend Developer — 360Codes — 2016 – Present (contract, part-time)

Laravel, Filament, REST/GraphQL APIs

- Design and ship scalable Laravel backends for client platforms, emphasizing clean architecture, testability, and maintainable code.
- Build high-performance admin dashboards with Filament, cutting operational overhead for non-technical teams.
- Integrate third-party services via RESTful and GraphQL APIs with secure, reliable data exchange.

Freelance Software Developer — Self-employed — 2009 – 2016

- Delivered custom PHP/MySQL web applications and CMS platforms for local businesses, owning the full project lifecycle from requirements to deployment and maintenance.
- Optimized database schemas and queries for speed and reliability under production load.

Web Developer — Memphis Tours Egypt — until Sep 2009

- Maintained and enhanced high-traffic tourism platforms (PHP/MySQL) during peak booking seasons.
- Improved server performance and page-load times to absorb seasonal booking spikes.

SELECTED PROJECTS

SkyBridge Ticketing Platform — facilitiesservices.sa

- High-traffic event ticketing system (Laravel, MySQL, Redis, REST APIs) processing **28,000+ bookings at 99.9% uptime** during peak hours — secure payment gateways and real-time ticket availability.

Gobook — Multi-tenant SaaS Booking Engine

- Multi-tenant reservation platform (Laravel, Filament, MySQL, Redis) with tenant isolation, financial tracking, scheduling, and customer management.

IshraqMed Healthcare Portal

- Appointment scheduling engine (Node.js, GraphQL, real-time push notifications) — lifted patient bookings **+35%** via automated scheduling.

aiZee — Sovereign AI OS — github.com/m3taz-ahmed/aizee

- Version-controlled AI governance system (Python, MCP) enforcing policy, budget, and audit-trail guardrails for agent-orchestrated development — 29 personas, 150+ skills, 7,400+ tests.

Tourx — AI-assisted Travel Platform

- Personalized trip planning and real-time tourist support (Laravel, Node.js, GraphQL, LLM integration).

Business Belarabi — B2B Directory & Podcasts — businessbelarabi.com

- B2B directory (Laravel, Filament, MySQL) with a flexible survey engine, executive PDF/Excel reporting, and optimized search across 200+ businesses.

Raunautica Maritime Dashboard — raunautica.com

- Marina operations dashboard (Laravel, Filament, Redis) automating docking and inventory through real-time workflows.

EDUCATION

Bachelor of Commerce — Ain Shams University, Cairo, 2006
