Senior Software Engineer & Systems Architect with 15+ years building scalable, audit-ready backend systems and a focused practice in Sovereign AI architecture. Expert in PHP 8.5, Laravel 13, and Filament v5, with a rare dual lens in software engineering and internal audit compliance. Proven track record across high-traffic ticketing (28,000+ bookings, 99.9% uptime), AI-assisted travel systems, B2B directories, SaaS booking engines, and internal audit digital transformation.

Technical Skills

- Backend & APIs: PHP 8.5, Laravel 13, Node.js 24, RESTful APIs, GraphQL, Microservices, Real-time Systems
- Admin & Dashboards: Filament v5, Livewire v4, Alpine.js, Tailwind CSS v4, Blade Components, RTL/LTR Integration
- Database & Performance: MySQL 9.7, PostgreSQL 17, Redis, Schema Design & Normalization, Query Tuning, Data Integrity
- Architecture, Security & AI: SOLID Principles, MVC, Design Patterns, RBAC, OWASP, Audit-Ready System Design, AI/LLM Governance, Version-Controlled Intelligence
- Infrastructure & DevOps: Docker, Git/GitHub Actions CI/CD, Linux Server Management (Nginx/Apache), VPS & Shared Hosting

Professional Experience

• Lead Systems Architect — Internal Audit Solutions

- Petroleum Pipelines Company (PPC) | 2016 – Present
- Architected a custom audit ecosystem (InternalAuditingSys) that digitized manual compliance workflows, ensuring 100% data consistency across audit cycles and multi-tier manager approvals.
- Designed a granular RBAC framework to segregate auditor and management privileges, enforcing data access control and audit-trail integrity.
- Built an automated reporting engine that generates quarterly audit summaries and compliance reports, accelerating executive decision-making and eliminating manual report assembly.

• Back-End Developer: 360Codes | 2016 – Present (Part-time)

- Design and ship scalable Laravel 13 backends for client platforms, emphasizing clean architecture, testability, and maintainable code.
- Build and maintain high-performance admin dashboards using Filament v5, reducing operational overhead for non-technical stakeholders.
- Integrate third-party services and RESTful/GraphQL APIs, ensuring secure data exchange and reliable system interoperability.

• Freelance Software Developer: Self-Employed | 2009 – 2016

- Delivered custom PHP/MySQL web applications and content management systems for local businesses.
- Optimized database schemas and queries to improve application speed and reliability for small-scale business operations.
- Owned the full project lifecycle: requirements, architecture, implementation, deployment, and ongoing maintenance.

• Web Developer: Memphis Tours Egypt | Until Sep 2009

- Maintained and enhanced legacy tourism platforms built with PHP/MySQL during high-traffic seasonal periods.
- Optimized server performance and user experience to support booking spikes and reduce page-load friction.

Projects

- **AI Globals**

- Version-controlled AI governance framework (Python, JSON/YAML, LLM alignment) defining global rules, tech stack standards, and architectural guardrails for Sovereign AI development.

- **SkyBridge Ticketing Platform (facilitieservices.com)**

- High-traffic event ticketing system (Laravel 13, MySQL 9.7, Redis, RESTful APIs) processing 28,000+ bookings at 99.9% uptime during peak hours; integrated secure payment gateways and real-time ticket availability.

- **Raunautica Maritime Dashboard (raunautica.com)**

- Maritime operations dashboard (Laravel 13, Filament v5, Redis, Eloquent) automating marina docking and inventory management through real-time workflows.

- **IshraqMed Healthcare Portal (ishraqmed.net)**

- Healthcare appointment scheduling engine (Node.js 24, GraphQL, Real-time Push Notifications) that increased patient bookings by 35% through automated scheduling and real-time notifications.

- **Business Belarabi (businessbelarabi.com)**

- B2B directory and podcast platform (Laravel 13, Filament v5, MySQL 9.7) with a flexible survey engine, executive PDF/Excel reporting, and optimized search handling 200+ businesses.

- **InternalAuditingSys**

- Internal audit management system for Petroleum Pipelines Company (Laravel 13, Filament v5, MySQL 9.7, RBAC) streamlining cross-department workflows, manager approvals, and role-based access, ensuring 100% data consistency and audit-ready compliance.

- **Gobook**

- Multi-tenant SaaS booking and reservation management platform (Laravel 13, Filament v5, MySQL 9.7, Redis) with integrated financial tracking, scheduling, and customer management.

- **Alqenaat**

- Family community platform for a large Kuwaiti family (Laravel 13, Filament v5, MySQL 9.7) managing hall bookings, donations, and assistance requests through secure role-based access and financial tracking.

- **Gentoura**

- AI-assisted travel platform (Laravel 13, Node.js 24, GraphQL, AI/LLM integration) generating personalized trip plans and providing real-time support for tourists.

- **Yachnile**

- Nile marina management system (Laravel 13, Filament v5, MySQL 9.7, Redis) handling docking, inventory, and operations workflows.

Education

Bachelor of Commerce, Ain Shams University - June 2006
